

Create your very own blend of homemade gin
with the Mad Millie Handcrafted Gin Kit.

FOLLOW THIS SIMPLE HOW TO GUIDE

1 Pour the vodka into the 1 L (1 US qt) jar provided in the kit.

2 Add the blend of Mad Millie botanicals into the jar with the vodka.

3 Gently stir then leave to steep for 48 hours so the botanicals can infuse.

4 Fold the filter paper into quarters and open one fold to form a tight cone shape. Place into the funnel.

5 Place the funnel into the bottle and slowly pour the freshly made gin into the funnel, making sure all the liquid is contained in the filter paper.

6 The filtered liquid should be free of any botanical solids and display a lovely golden hue. Label and enjoy your handcrafted gin!
